F4U-1, -4 CORSAIR (MODELMANIA) BY ADAM JARSKI PDF

The book starts with a brief historical description of the airplane, its design, development and combat service history and numerous photos covering both wartime shots and preserved aircraft in full-colour. Worth attention are the beautiful colour charts showing the servicing stencils arrangement and detailed plans in scales 1:48 and 1:72. The model chapter describes and shows building process of two models - the Trumpeter and the Tamiya. Illustrations: 16 b/w photos, 168 colour photos, 30 drawings, 31 pages with scale plans, 22 colour pages with profiles About ModelMania Every book covers a particular variant of the aircraft. Featuring development history and a presentation of airplane's complete design, with all the smallest details of both airframe and engine. We focus on depicting elements important to a modeller making the most accurate miniature. Included are photographs which show the examples preserved in museums and private collections from all over the world- they are in many cases still airworthy and flying at the air shows. Scale plans of the aircraft and drawings from its operational manual are also included. Colour plates presenting camouflage schemes, markings and stenciling are additional illustrations. One of the chapters also includes hints and tips from award-winning modellers. The books also feature reviews of model kits and additional accessories for them available on the market. A free decal sheet is included with every book. The series is fully bilingual- Polish/English.

Two much "double dipping" to rate 5 stars

By Jim Davis

This is a 128 page, 8" x 11-1/2", square bound card cover. It is number 9 in AJ Press' Modelmania series. It is dual language, English and Polish. The English is serviceable but not outstanding. Color is used throughout. A sheet of decals in the three common scales is included. If buying secondhand ask if they are included if these are important to you.

The book is divided up as follows. The first 25 pages are a design and development history. The next 31 pages consist of 1/48th and 1/72nd scale drawings. There then follows 22 pages of color profiles including a two page spread showing decal placement. Then there are 33 pages of color photographs and technical manual drawings. The photos are of surviving examples and include many detailed close up shots. The book finishes up with 17 pages describing and reviewing the 1/32nd Trumpeter F4U-4 and the 1/48th Tamiya F4U-1 kits.

All is first rate. The only caveat is that much of the material is lifted directly from the same publisher's

Aircraft Monograph 10 F4U Corsair title (and its Polish equivalent). Only the last two sections contain completely new material. The 1/72nd scale drawings are unique to this volume.

In sum, the general enthusiast would probably be happier with the earlier Aircraft Monograph 10 volume but the close up photos will be missed. The modeller might have other priorities.
