Excellent book!

By EarthyOne

I bought this for my 12 year old son, who is very gifted when it comes to origami. He loves it and has done several of the projects, including the "number" pop-ups for birthdays. He has seen a lot of books on origami and says this one has great instructions and that the author has quite the sense of humour. It is not a beginner's book, for the record.

So Shaferesque!

By Harry Holloway

Since I teach Pop-ups as part of my Geometry Course, and love origami this book was quite a find! Jeremy Shafer was is usual creative self, with models and humor mixed together. Most models require specialized paper, but that would also be normal for cards anyway. His technique of first teaching the figure that will pop-up and then the card, is really interesting, He has a list of his U-tube tutorials in the back, so I plan to find some fun viewing time in the next few days. Oh, I should note I feel the cards range from low intermediate to complex, but there is also simple models mixed in.
