Fantastic book for open wheel race fanatics..

By A. Armitage

Dr Steve Olvey has done a wonderful job at putting us behind the scenes in a place only a few ever know about. This is not a book for the faint of heart, it tells it like it is. The men and women who are first response and emergency medics are to be commended for the amazing work they do. Many owe their lives to the Rapid Response they have received, and the fans owe a debt of gratitude for keeping our heroes of the race racing another day.

NOT JUST FOR RACING ENTHUSIASTS

By Skippy

This book was written by one of the 2 doctors who have rescued drivers in the Indy Car racing series for many years.

As someone who has followed Indy racing for many, many years, I was fascinated to read how medical procedures were developed to take care of the injuries specific to Indy Car drivers. It was fascinating also to see how many of these procedures then were used in day-to-day medical rescue care.

Not for everybody, but I found it fascinating and drivers should be thankful for the author's work!

Life or Death in the Crash Zone

By Mark M.

I was glued to my seat, um, the page. The book was hard to put down once I got into it. It revealed how little I knew about the behind the scenes effort of the safety crews involved at race venues around the globe. And here I thought I was a well informed race fan! The medical center "turf Wars" by the hospital staffs was a shocker, especially given the severity of injuries and consequences of surgical methods that could end a driver's career in an instant.

If you are a race fan, you will enjoy this book.
